transferred from **University of Washington**

4 quarters in Seattle, WA

2011-12

Universidad Europea de Madrid

2 quarters in Madrid, Spain

Jan-May 2015

Approach

design × computing × business × math

Everything I make is informed by my background in these four fields, and the intersections between them. My computer designs, typography and colors are all built on a mathematical layer. By using intuitive cues and a minimal approach in my interfaces, I aim to distill powerful ideas into smooth, simple experiences.
